CONTENTS TO VOLUME XXXV.

CXCIV. JULY, 1912.

On the Vibration of a Lecher System using a Lecher Oscillator, II. F. C. BLAKE and CHARLES SHEARD 1
Nutation in Practical Applications of Gyro-action. BURT L. NEWKIRK 27
Circular Dichroism and Rotatory Dispersion of Certain Salt Solutions. L. B. OLMSTEAD 31
The Definition of an Ideal Gas. E. F. FARNAU 47
A Relation Between the Magnetic and Elastic Properties of a Series of Unhardened Iron-Carbon Alloys. C. W. WAGGONER 58
The Crystallization of Carbon-Dioxide, Nitrous Oxide and Ammonia. H. E. BEHNKEN 66
Proceedings of the American Physical Society 74

The Effect of the Character of the Source upon the Velocities of Emission of Electrons Liberated by Ultra-Violet Light, *R. A. Millikan;* Note on the Variation from Lambert's Cosine Law of the Emission from Tungsten and Carbon at Glowing Temperatures, *A. G. Worthing;* Some Further Results of Precision Measurements of Refractive Indices as a Function of Temperature, *F. A. Molby;* Rotations in the Metallic Arc, *W. G. Cady;* The Linear Expansion of Invar Steel, Between 100° C. and —190° C., *F. A. Molby.*

CXCV. AUGUST, 1912.

The Hall Effect in Bismuth with High Frequency Currents. ALPHEUS W. SMITH 81
Some Aspects of the Dynamics of the Gyroscope. FREDERICK SLATE 86
The Elastic Properties of Bismuth Wires. J. E. HARRIS 95
The Half-Value of the Radioactive Deposit Collected in the Open Air. FREDERIC A. HARVEY 120
The Melting of Ice in a Mixture of Ice and Water. E. E. SOMERMEIER 128
Some Emission Theories of Light. RICHARD C. TOLMAN 136
The Electrical Conductivity of Bismuth-Thallium Alloys. A. E. WHITFORD 144
Note on Absolute Formulæ for the Mutual Inductance of Coaxial Solenoids. G. R. OLSHAUSEN 148

CXCVI. SEPTEMBER, 1912.

On the Theory of Relativity: Analysis of the Postulates. R. D. CARMICHAEL 153
On the Motion of a Disc with Three Supports on a Rough Plane. PETER FIELD 177
The Effect of Vibration on the Resistance of Metals. H. L. BRAKEL 185
Reflection of β Rays by Thin Metal Plates. WILLIAM B. HUFF 194
A Spontaneous Electromotive-Force in Cells of Alkali Metals. JAY W. WOODROW 203
Diffraction Grating Method for Determining Index of Refraction. FREDERICK A. OSBORN and HORACE H. LESTER 210
A Study of the Spheroidal State. C. W. BATDORF 214
A Theoretical Correction to the Drop Method of Determining the Elementary Charge. ARTHUR C. LUNN 227
The Mechanical Forces between Moving Electric Charges. R. F. SHARPE 231
Proceedings of the American Physical Society 233

A Method for the Production of a High Potential for Electrometer Work, *A. H. Forman;* The Ionization from Heated Salts, *Charles Sheard;* The Expansion of Water below Zero Degree Centigrade, *John Fred Mohler.*

CXCVII. OCTOBER, 1912.

Ionization and Photo-electric Properties of Vapors of Alkali Metals. S. HERBERT ANDERSON 239
Heats of Dilution. WILLIAM FRANCIS MAGIE 265
The Relation of Osmotic Pressure to Temperature. WILLIAM FRANCIS MAGIE 272
On Characteristic Atomic Charges and Resultant Molecular Charges. FERNANDO SANFORD 276
Comparative Studies of Magnetic Phenomena. III. Magnetic Induction in a Group of Oblate Spheroids of Soft Iron. S. R. WILLIAMS 282
The Magnetization of Heusler Alloys as a Function of the Temperature and Calculation of the Intrinsic Magnetic Field. PERCY WILCOX GUMAER 288
Notes on Optical Constants of Metals. J. T. LITTLETON, JR. 306
The Kerr Rotation for Transverse Magnetic Fields, and the Experimental Verification of Wind's Magneto-Optic Theory. L. R. INGERSOLL 312
New Books 322

CXCVIII. NOVEMBER, 1912.

On Electromagnetic Induction and Relative Motion. S. J. BARNETT 323
On Electrostatic Screening by Thin Silver Films. MISS SHIRLEY HYATT 337
Notes on the Elastic Peculiarities of Platinum-Iridium Wires. L. P. SIEG 347
Analysis of Complex Sound Waves. C. W. HEWLETT 359
A New Method of Photographing Sound Waves. ARTHUR L. FOLEY and WILMER H. SOUDER 373
Oscillographic Study of the Singing Arc. J. E. HOYT 387
Proceedings of the American Physical Society 397
Minutes of the Sixty-Third Meeting; Analogue of the Von Waltenhofen Phenomenon in the Joule and Wiedemann Magnetostrictive Effects in Nickel and Steel Rods, *S. R. Williams;* The Reflection of Electrons, *A. W. Hull;* Variation of Electrical Resistance with Temperature, *A. A. Somerville;* The Spectral Luminosity Curve of the Average Eye, *Herbert E. Ives;* Conditions for Obtaining Rapid Light Fluctuations from Incandescent Wires, *C. F. Lorenz;* The Asymmetric Emission of Secondary Rays, *O. W. Richardson;* The Oscillatory Discharge of a Leyden Jar, *R. R. Ramsey.*

CXCIX. DECEMBER, 1912.

Viscosity and Fluidity. A Summary of Results. EUGENE C. BINGHAM 407
Determination of Capacities by Means of Conjugate Functions. J. W. WOODROW 434
Some Remarkable Cases of Resonance. C. V. RAMAN 449
The Potential and Electrostatic Force in the Field of Two Metal Spherical Electrodes. GEO. R. DEAN 459
An Attempt to Detect Possible Changes in Weight or Momentum Effects on Charging a Condenser. P. G. AGNEW and W. C. BISHOP 470
A General Problem in Gyrostatic Action. J. W. MILNOR 477
On the Nature of the Volta Effect. FERNANDO SANFORD 484
New Books 490
Index 491
